

Around the World

Novelties from VAUEN
Spring/Summer 2023

Dear pipe lovers,

Some airlines offer you the opportunity to buy a round-the-world ticket or perhaps you've collected enough air miles to travel around the world. Our VAUEN products are also available all over the world in over 60 countries. Since 1848, we have been supplying our products to connoisseurs all over the world by plane, ship, car, rail or alternative methods of transport.

With our new products for spring/summer 2023, we've packed a few treats into your hand luggage for you again and we are delighted to be able to get the new year off to a good start with you. From nature and classics to our Edison "spaceship pipe", we'd like to present some more beautiful and extraordinary pieces to you again.

Please take a seat in your departure lounge and relax whilst you read through our new brochure.

We hope you have a wonderful time and that you enjoy the first little bit of sunshine with us!

With all our best wishes

Martin Ramsauer
Managing Director

This abbreviation identifies pipes with a particularly attractive grain or an elaborate manufacturing.

Pipe of the Year 2023

Delivering this year's Pipe of the Year in one of our historic VAUEN delivery vehicles would definitely have been fitting. We deliberately chose a classic design for our Pipe of the Year 2023 and we were inspired by Danish influences when creating the design.

The balanced and proportionate bowl stands out thanks to its soft lines, which are beautifully complemented by a slim stem. The overall impression is rounded off by a prominent ring connection and a short mouthpiece, which is equipped as usual with our crossed pipes in sterling silver: **exclusive, limited edition and individually numbered.**

Imagine a historic sailing boat made out of wood with a natural patina, oiled planks and its own **perfect imperfection**. We are aiming to create this wonderful look with our new 'BASIC Nature' pipe, too. A very extraordinary briar wood pipe in its original condition. The softer areas have been carefully crafted from burr wood by our **sandblaster** to literally "go deep" when it comes to the grain of the wood. The surface, with its unmistakable character, is perfected with **oil which is applied by hand**. This protects the pipe... and not just from high waves. 3 models are available for you to choose from.

Be inspired by this natural look!

Back in 1842, Queen Victoria was the first British monarch to travel by train. She travelled on the royal train. Our 'Royal' Series is also a popular classic. We were delighted to respond to the large number of requests we received to bring back this **special series**.

This classic 'Royal' Series with a beautiful colour scheme stands out thanks to its **classic shapes** and simplicity. Our sophisticated white dot models feature a sterling silver ring and our standard designs in the 'Royal' Series feature a polished aluminium ring.

Our **waxed white dot design** in a light shade of brown **with a sterling silver ring** looks simply perfect.

The second design in the 'Royal' series features a **sandblasted surface** in classic black. Thanks to the sandblasting, the heat dissipates wonderfully and the pipe feels great in your hand.

Like the smooth white dot design, the stem features a fine sterling silver ring and you have the **option of choosing between 6 lovely shapes.**

The first train ran between Nuremberg and Fürth on 7 December 1835. 13 years later, the VAUEN pipe manufactory was founded.

175 years later, we are completing our **18-piece** 'Royal' Series with our orange/brown pipe, which stands out thanks to its high-quality polished aluminium ring.

Find your favourite piece from the Royal collection!

A ranger flies his biplane to various places in a national park and checks everything is as it should be. We wouldn't be surprised if he took the VAUEN 'Ranger' on board with him to enjoy a nice break from his work from time to time.

Our new 'Ranger' stands out thanks to its natural green and is a really eye-catching piece. The sandblasted surface is transformed to create a vintage look in several stages. The **brushed aluminium ring** and the brown mottled mouth-piece go perfectly with the green bowl.

The 'Ranger' is available in 6 different shapes.
When will you treat yourself to a break?

EDISON

Thomas Alva Edison is known as the inventor of electric lighting. Carbon filament lamps already used carbon material at that time. Carbon is popular to this day and is used in lots of fields, such as aviation and space travel. Whilst you can't fly to the moon with our new 'Edison' model, you can really enjoy the lovely design on our planet with our new Summer Blend tobacco. The centrepiece of the model is a timeless carbon ring, which is embedded in a light grey, shiny bowl and mouthpiece in the same colour. This piece is available in 6 different shapes.

Keep both your feet firmly on this planet with our 'Edison' model.

Summer Blend

TOBACCO SUMMER BLEND
50g tin

A summery composition of brown and black Cavendish in different cut widths form the basis of this mellow blend and this ensures that you can enjoy an even burn.

We added golden Virginia tobacco, which enriches the overall flavour in a subtly sweet way. The **fresh aroma of watermelon** offers a surprising accent with its fruity scent and **blissful flavour**.

In combination with our tried-and-tested Dr. Perl junior filters and the popular VAUEN pipe cleaners, you'll have everything you need to make this summer perfect.

Enjoy the long, warm summer evenings with us!
