in style«

**Novelties from VAUEN**  
Autumn/Winter 2022

**Dear pipe lovers,**

Countless different influences, events and circumstances shape our private, professional and family lives. It is important to find your own way and your own personal style.

Our new autumn/winter 2022 brochure embraces the philosophy of "Living in style" and its atmospheric images transport you to fascinating realms of enjoyment. Coupled with our attractive new models, we want to create a space for your personal ideas and wishes.

Be inspired by the atmosphere and immerse yourself in a world of your own making. Create your own personal style together with us and our new products.

We wish you all the best, good health and many relaxing moments!

With all our best wishes,

**Martin Ramsauer**  
Managing Director

This abbreviation identifies pipes with a particularly attractive grain or an elaborate manufacturing.

Fancy a cool road trip? Maybe on an old motorbike and, of course, with your favourite VAUEN pipe. Thanks to our new WOOG designer model, you are guaranteed to have the right pipe in your luggage.

The monoblock design was developed with our partner agency Brandis Industrial design. The bowl is made of high-quality ceramic composite and is manufactured in a complex 3D printing process. A red, anodised aluminium ring has been incorporated on the bowl and gives the pipe with the red trim line on its shank its sporty character. The interior of the bowl and the inside of the shank are lined with briar wood. Thanks to its balance, the modern-looking WOOG pipe is also suitable as a sitter pipe with a very refined look. Start your engines!

The WOOG is a limited edition of 750 and available in a black or grey matt finish.

In water sports, a fin is responsible for maintaining directional stability, among other things. In our new FINN model, the fin-like polished ring gives the pipe its unique appeal. The combination of its light brown waxed surface and the Vauen white dot quality mark creates a noble and elegant appearance. Six different shapes offer a versatile choice. Cast off the lines!

The sandblasted version of our new FINN model not only provides excellent photo opportunities thanks to its attractive dual-colour look, our sandblasting artists have also succeeded in creating filigree handiwork that picks up on the shape of the ring on the shank and ensures a cooler smoking experience thanks to the enlarged surface. Here, too, you can choose your favourite between six different bowl shapes. So, pack up your bags and set off on your personal voyage of discovery or photo safari.

In this age of home office and remote working, it's much easier to enjoy a nice pipe. And our new SHINE series is a shining companion. The word "shine" stands, among other things, for the meditation form "Shamata", which translates as "calm and peaceful abiding". This is exactly what this noble series with its polished bowl ring and three grooves invites you to do. The silver-coloured ring-mouthpiece combination provides a pleasant lip. There is a choice of six different bowl variants. A perfect addition to your everyday office life.

*A perfect addition  
to your everyday office life!*

Turn back the clock to the Golden Twenties. An era of joie de vivre and enjoyment in which the three new models of our 6 mm pipe series, SIX, fit perfectly. The series was already launched successfully last year to mark the occasion of our anniversary "100 years of Dr. Perl Filters" together with our 6 mm Dr. Perl junior activated charcoal filters.

And the new addition to the range is a real highlight! These three new models completely redefine the design language thanks to the unprecedented shank-to-bowl ratio. As a finishing touch, a polished copper ring adorns these noble components. These special models are available with three different bowl shapes and three finishes with a smooth or sandblasted surface. Shapes that inspire, hand-made in Nuremberg.

Be enchanted!

Colours play a decisive role, and not just in Texas Hold'em Poker. In our new FLAME series, we also wanted to successfully set colour accents with the orange ring flanked by two silver-coloured rings. As a contrast, the dark colour tone with shimmering grain underlines the new model range. A choice of six different bowls is available at a very attractive price. The game can begin, the cards are reshuffled, preferably in a smoky atmosphere.

Imagine an interesting book that you would like to "dip into" for a short time. After an hour or two, you realise the story has you firmly in its grip.

With our new RELAX Churchwarden pipe series, we would like to make this "time out" even more pleasant for you. Two different bowl shapes in three attractive designs offer you a faithful companion when you've got a little more time on your hands. The shank features a polished ring end which, depending on your wishes, can accommodate the army-mount mouthpieces in either long or short version – both of them are included.

Which model suits your next book?

**TOBACCO GRANDPA'S BLEND**  
50gr box

Our latest tobacco creation "GRANDPA'S BLEND" is a mild tobacco blend of Black Cavendish and various Virginia varieties with a certain something extra.

The subtle vanilla aromas of the tonka bean harmonise ideally with the smoky caramel note; a sweet-tart composition that also exudes an extremely pleasant aroma. Different cutting widths guarantee an even burn. It's a tobacco that could easily bridge several generations.

How about a leisurely hiking tour through Auenland? Our successful Auenland series has once again been expanded. With its light bowl and elegant curve, our distinctive SUNDGARD model fits perfectly in your hand. The lateral facets, which taper to a point at the front, give the pipe a harmonious balance between angular and flowing lines.

As usual, there are two finishes, smooth and sandblasted, both in an earthy dark brown.

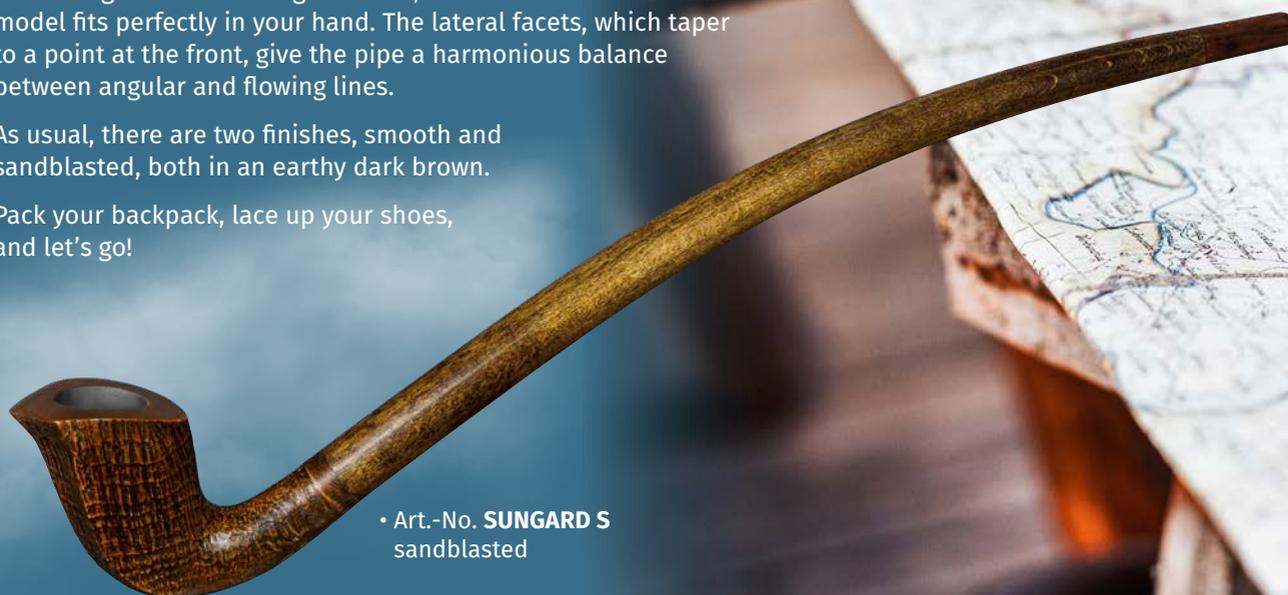

Pack your backpack, lace up your shoes, and let's go!
